In the attachments you may find U++ packages with following Allegro5 third party libraries:

AL - OpenAL cross platform audio library (v1.13)

bzlib - bzip2/libbzip2 - a program and library for lossless, block-sorting data compression (v1.0.6)

freetype - FreeType 2 font engine (v2.4.11)

jpeg - JPEG image file format (v9a)

ogg - Ogg - Media container (v1.3.2)

physfs - PhysicsFS - a portable, flexible file i/o abstraction (v2.0.3)

png - PNG image file format (v1.6.16)

theora - Theora - Video codec (v1.2.0alpha)

vorbis - Vorbis - Audio codec (v1.3.4)

zlib - zlib compression library (v1.2.8)

Edit: Removed png/CHANGES file to reduce file size of attached archive, because of file size requirements.
