Hey Mirek,

Just found this as I was having trouble installing the MSC10x64 compiler. I am wondering if this is the fabled patch

<a href=" http://connect.microsoft.com/VisualStudio/feedback/details/6
83852/fail-to-install-windows-sdk-to-add-x64-cross-compiler-
to-visual-c-2010-express-running-on-x86-pc-based">here

and

<a href=" http://www.microsoft.com/en-us/download/details.aspx?id=4422">here<a/>

Will experiment and report back but wanted a record of it on here in case I forget where I found it

N

EDIT - no that doesn't fix it but this might be useful to anyone having trouble getting the 64 bit compilers so I'll leave it here.
