I don't understand how it works...

RepGenCalculateBodyBeforeSubst() and RepGenCalculateBodyAfterSubst() seem to never been called, neither in Repgen.cpp nor in AdressBook.cpp...

PCRE\_Replace(String& where, String s\_from,String s\_to) doesn't works, because where is null...

(Just trying with the files in bazaar without any change).

???

When (or how) RepGenCalculateBodyBeforeSubst() and RepGenCalculateBodyAfterSubst() are supposed to be called ?
