Subject: Re: TheIDE startup should be now faster
Posted by Zbych on Tue, 04 Sep 2012 09:20:17 GMT

There is a problem with this new startup on linux when assembly directory is located on a disk that is not mounted when theide is starting. Package list is empty (this is ok), but even if I mount the disk and restart theide, package list is not populated.
I have to remove all cache files from ~/.upp/theide/cfg to fix this problem.
