Zbych wrote on Tue, 04 September 2012 05:20: There is a problem with this new startup on linux when assembly directory is located on a disk that is not mounted when theide is starting. Package list is empty (this is ok), but even if I mount the disk and restart theide, package list is not populated.

I have to remove all cache files from ~/.upp/theide/cfg to fix this problem.

This reminds me that "other" problem fixed. Do you have the latest svn?
