Hello,

I have tried to compile the latest TheIDE/U++ svn build (as of september 5, 2012, it is theide-nogtk-svn 5318-1) from the AUR on my ArchLinux desktop, but compilation process failed with the following error:

```
./aur-theide-nogtk-svn/src/uppsvn/uppsrc/CtrlLib/ChGtk.h:9:21: fatal error: gtk/gtk.h: no such file or directory
```

I don't have gtk installed in my machine. Does "nogtk" version also depend on gtk?? Or am I doing something wrong?

Thanks in advance.

Regards.
