U++ 602rc.

SetDateFormat("%4:Day %3:02d/%2:02d/%1:4d"); // "Wednesday 10/05/2006 10:23:43"

  status(false, "%s\n", (const char *) Format("UFxp v%d.%02d %`",0, 6, GetSysTime()));

Prints out:

UFxp v0.06 Sunday 17/06/2006 11:51:24

And unix says:

lundman@netbsd(/home/lundman/upp/MyApps/UFxp) date
Sat Jun 17 11:58:03 JST 2006

How did Saturday become Sunday?
