Hi Jan

I've got small bug report for you. On Linux Mint 13 Xfce 64bit (Ubuntu 12.04 based) makefile from trunk r5321 fails:

```
sam@herkales ~/.upp_makefile $ make PKG=Bombs FLAGS="GCC"
/bin/sh: 5: Syntax error: "then" unexpected (expecting "done")
make: *** [do-build] Error 2
```

This is caused by /bin/sh linking to /bin/dash. After

```
sam@herkales ~/.upp_makefile $ sudo rm /bin/sh
[sudo] password for sam:
sam@herkales ~/.upp_makefile $ sudo ln -s /bin/bash /bin/sh
```

makefile works like a charm.

Thanks for your excellent work.
Lubos
