zoro wrote on Wed, 19 September 2012 07:45I am trying to compile out of the box skylark application, with all default setting, MINGW compiler. Compilation gives lots of error.

The very first error I get is "error: 'IniBool' does not name a type", in the skylark.h file at:

```
namespace Ini {  
extern IniBool skylark_log;  
};
```

Any suggestion?

Thanks in advance.

Hi zoro,

Welcome to the forum

IniBool and other Ini* types are defined in Core package. I think you should have `#include <Core/Core.h>` before including Skylark.h.

Best regards,

Honza
