Welcome to the forum.

Mircode wrote on Mon, 24 September 2012 09:25I should really read through a c++ book someday.

I bet this was invented by people who used global variables all the time but then they were forbidden to do so because its bad style.

Global variables are not forbidden. Local variables are safer and takes less memory.

U++ will be good for you to learn C++ but you do need to do some reading to learn the basics and concepts.
