masu wrote on Thu, 27 September 2012 20:37Hi,

I think with a new release, we should switch to a better build system like the one reported here:
http://www.ultimatepp.org/forum/index.php?t=msg&goto=353 81&&srch=Makefile#msg_35381

The exported Makefile is not flexible enough and it is big ~800kB.
The easiest thing would be to use the universal Makefile as a replacement.

Regards,
Matthias
Well, you're free to use it It's here for anyone. Plus, it is already used for .deb package building
