I discover,that MySQL automatic schema upgrade is not work normally on Mysql server ver 5.5.

I propose this change to Package Sql, file SqlSchema.cpp
(added Rows 25-28)

```
  if(dialect == MSSQL) {
   Upgrade() << Expand("alter table @t add ") << cn << ";\n";
   Upgrade() << Expand("alter table @t alter column ") << cd << ";\n";
  }
  else if(dialect == MY_SQL)       //Added
   Upgrade() << Expand("alter table @t add ") << cn << ";\n"; //Added
   Upgrade() << Expand("alter table @t modify ") << cd << ";\n"; //Added
  }        //Added

  else if (dialect == SQLITE3)
   Upgrade() << Expand("alter table @t add ") << cd << ";\n";
```
