I discover,that MySQL automatic schema upgrade is not work normally on Mysql server ver 5.5.

I propose this change to Package Sql, file SqlSchema.cpp
(added Rows 25-28)

```
if(dialect == MSSQL) {
    Upgrade() << Expand("alter table @t add ") << cn << ";\n";
    Upgrade() << Expand("alter table @t alter column ") << cd << ";\n";
}
else if(dialect == MY_SQL)    //Added
    Upgrade() << Expand("alter table @t add ") << cn << ";\n"; //Added
    Upgrade() << Expand("alter table @t modify ") << cd << ";\n"; //Added
}    //Added

else if (dialect == SQLITE3)
    Upgrade() << Expand("alter table @t add ") << cd << ";\n";
```
