I discover,that MySQL automatic schema upgrade is not work normally on Mysql server ver 5.5.

I propose this change to Package Sql, file SqlSchema.cpp

(added Rows 25-28)

```
if(dialect == MSSQL) {  
    Upgrade() << Expand("alter table @t add ") << cn << ";\n";  
    Upgrade() << Expand("alter table @t alter column ") << cd << ";\n";  
}  
else if(dialect == MY_SQL)      //Added  
    Upgrade() << Expand("alter table @t add ") << cn << ";\n"; //Added  
    Upgrade() << Expand("alter table @t modify ") << cd << ";\n"; //Added  
}      //Added  
  
else if (dialect == SQLITE3)  
    Upgrade() << Expand("alter table @t add ") << cd << ";\n";
```
