@koldo, I'm fairly skeptical (by the way) since like -- it seems that 'a lot' of these failed (OR WHATEVER) GUI Toolkits never advertise the fact that they are full of GPL/LGPL dependencies that are not to be 'statically linked' OR WHATEVER.... If I had to deploy "dynamically linked libraries" along with a 'static exe/so' -- that's more of a pain than releasing a JAVA app Dependant on JUST ONE JRE download/install. O.K.?
