jheblack wrote on Fri, 28 September 2012 00:31 -- that's more of a pain than releasing a JAVA app Dependant on JUST ONE JRE download/install. O.K.?

I do programming in Java by necessity and C++ in U++ for power, speed, memory, threads, openGL v jogl 32/64, etc..

Read the java acceptance/again.

Java can be 'decompiled' too easily.

It is just a matter of choice.
