It seems like you are pretty sharp.

Google's 10MB clarifies the size.

The GUI code is usually included in the U++ .exe
Without an idea of what kind of GUI you intend to use it is hard to even guess.

A micro SD card is about 1/2 x 3/8 x 1/32 inch, quite small.

Many cell phones use them for the camera photos.
Most tablet, slate. etc. have slots for SD cards, some full size but when you buy a micro it usually comes with an adapter.
32GB micro on sale at Fry's for $12.

One exception is many Apple devices where they charge by installed memory, no sd slot more $$$.
