
Subject: 'Web/Web.h': No such file or directory

I just updated U++ from 5303 to 5393 and get the fatal error:
fatal error C1083: Cannot open include file: 'Web/Web.h': No such file or directory

This is when using MSC9 or MSC10.

In this thread:

<http://www.ultimatepp.org/forum/index.php?t=msg&th=6644& amp; amp; amp;start=0&>

`#include <Ws2ipdef.h> and #include <Ws2tcpip.h>
addrinfo`

How much of this will be included in the U++ core and what will be needed?

My socket code has been using:
`#ifndef _ConnSock_ConnSock_h_
#define _ConnSock_ConnSock_h_`

`#include <Web/Web.h>`

`using namespace Upp;`

Will this be addressed or should I revert back to 5303?
