Subject: Re: Web/Web.h': No such file or directory Error still remaining
Posted by omari on Sun, 07 Oct 2012 08:54:00 GMT

waiting to an update of Function4U, and
as a quick fix, I suggest you to remove the two files (GatherTpp.h, GatherTpp.cpp) from
Function4U package. (if you do not use them in your project.)

in general, instead of add Functions4U to your project, I think it is better to copy the functions or
files you interested in your package and modify them if necessary. (Functions4U has many
dependencies).
