Hello and thank you very very much for your fast reply.
Unfortunately I can only test it tonight, at about 8 pm (20:00 o clock)

I will give feedback then.

Oh and if you're updating the readme, is it possible that the wget syntax isn't correct?
I'm not very familiar to linux yet, but this looks very funny to me:
Quote:wget -O - http://upp.invothink.com/dolik.rce.gpg.key | sudo apt-key add -
What I mean is the "-" without any parameter? (like the O at -O)

//edit: Nevermind, got the solution. -O - is printing to STDOUT and - is bringing it to STDIN, right?
