luisrod0512 wrote on Sat, 13 October 2012 22:45:

```
EditField& InitCaps(bool b = true)    { initcaps = b; return *this; }
EditField& AllsCaps(bool b = true)     { allscaps = b; return *this; }
EditField& OnlyNums(bool b = true)     { onlynums = b; return *this; }
```

EditField::SetFilter is the generic way, no need to provide special modes for this.
