Subject: EditField.onFocus Event ?!?!?! Posted by nejnadusho on Mon, 15 Oct 2012 15:19:06 GMT

Hi there,

I am trying to achieve a pre-fill input textBox like the one in the picture at the bottom.

I could not find such function. Is there one?

So for that I just put a label inside the input textBox/EditField and I want to make it disappear whenever someone focuses on it and appear whenever looses focus.

For that I am attempting the following but it does not work.

```
SProject::SProject()
{
   CtrlLayout(*this, "Window title");
   Sizeable().Zoomable();

    //LogInTxtBox is the EditField tool name
   if (LogInTxtBox.FocusCtrl()){HideBoxText();}

   //or
    LogInTxtBox.Focus() <<= THISBACK(HideBoxText);
}

void SProject::HideBoxText(){
   usernameBox.SetLabel("");
}</pre>
```

And BTW is the EditField the right tool to use for an inputBox? How can I extract the input text from an EditField?

Thank you a lot.
