kohait00 wrote on Fri, 19 October 2012 10:54EDIT: maybe i can use doliks universal makefile generation for the purpose of eclipse building.. as a prebuild step or sth..

Note that the Makefile is now generated by UppBuilder package, which allows to easily write specialized tools based on the same parser of U++ files. So if you need some special handling for eclipse plugin or something, it can probably be done rather easily
