Hello,

I'm getting error message from compiler confined in the iml package. For example: the example package "iml" gives (under MSC8):

```
C:\upp\reference\iml\image.cpp(11) : error C2228: left of '.GetSize' must have class/struct/union  
type is "unknown-type"
```

```
C:\upp\reference\iml\image.cpp(11) : error C3861: 'Smiley': identifier not found
```

```
C:\upp\reference\iml\image.cpp(12) : error C3861: 'Smiley': identifier not found
```

My application doesn't compile with error:

```
C:\upp\uppsrc\Draw\iml_source.h(22) : error C2653: 'IMAGECLASS' : is not a class or namespace  
name
```

```
C:\upp\uppsrc\Draw\iml_source.h(23) : error C2653: 'IMAGECLASS' : is not a class or namespace  
name
```

```
C:\upp\uppsrc\Draw\iml_source.h(23) : error C2065: 'COUNT' : undeclared identifier
```

```
C:\Vega\Vega5\Vega.iml(32) : error C2078: too many initializers
```

The previous version compiled very good. Any idea?

Luigi
