nlnelson wrote on Sun, 08 July 2012 11:45: When TheIDE is opened or started the file and even the place in that file is saved for the next time it is opened.

Is there a way to have TheIDE open where it is not in the full screen mode?

That was back in July and it is still the same after many updates of u++

5494 always opens the IDE in full screen

The box that opens to pick the package can be moved and that is saved.

This is by design... (but I guess we can argue otherwise)

Mirek
