Subject: Re: Recent Problem with all u++ apps on Ubuntu 12.04
Posted by nlneilson on Wed, 31 Oct 2012 07:51:00 GMT

I just thought someone here may have run into this problem.

It is a problem with Ubuntu 64bit 11.10 to 12.10
There are two bugs filed on it.

One suggestion was to install the wine ppa and wine 1.5
Still not working.
With a google search there are other suggestion I have not tried yet.
