Subject: Re: Xmlize has problem with WithDeepCopy<Array<...
Posted by mirek on Fri, 02 Nov 2012 06:55:47 GMT

5503 is not enough, 5506 is the commit solving this problem.

No need to bury into this deeper, the reason why it was not working with WithDeepCopy is apparent (WithDeepCopy<Vector<T>> is not the same type as Vector<T> and template specialization for Xmlize was defined for Vector<T> only).

It is now fixed by moving Xmlize as Vector method, thus completely avoiding template specializations.
