Mirek,

On the non important issue.

In win7. When the upp app is docked on the task bar, if you right click on the app icon on top
appeared the most recently used/launched projects.

Well, I believe that while I was using upp 5390 those recently launched projects were updating.

Now with 5495 they were updating to some point and then stopped updating and when I removed
the entire list, this list never appeared again.

Best,
nejnio

P.S. I need some time to check what software I have on my pc.
