Setting Frameless(true); there is a problem.

It not only takes the top off but the right side and bottom.

A few pixels would be fine like it does on the left side but a big chunk from the right and bottom clips the EditFields.

Changing values in dlg.lay or in the .cpp file makes no difference
as far as the clipping amount on the right and bottom.
LeftPosZ(4, 245).TopPosZ(50, 106);
SetRect(4, 50, 247, 105);

Here is with the frame:

Frameless(true); Or is there a correct way to do it?
