Hi!

It would be useful to have 7zip's LZMA SDK in U++, maybe with an easy layer like:

```
7zFile f("test.7z");  
f.Add("file1.txt","this is some data");  
f.Add("file2.txt","more data");  
f.Close();
```

LZMA SDK is available at: <http://www.7-zip.org/sdk.html>

License is public domain.
