Subject: To get xml errors from LoadFromXML

Hello all

Now it is not possible to get errors in XML strings detected by LoadFromXML() because they are catched inside and removed.

I would vote to remove the try-catch from LoadFromXML() and let the programmer to handle the error properly.

```
bool LoadFromXML(Callback1<XmlIO> xmlize, const String& xml)
{
 try {
  XmlNode node = ParseXML(xml);
  if(node.GetCount() == 0)
   return false;
  for(int i = 0; i < node.GetCount(); i++)
   if(node.Node(i).IsTag()) {
    Value dummy;
    xmlize(XmlIO(node.At(i), true, dummy));
    break;
   }
  return true;
 }
 catch(XmlError) {}    // XmlError is removed
 return false;
}
```
