Subject: Re: Frameless(true); bug, my error or ???
Posted by nlneilson on Sat, 17 Nov 2012 03:11:23 GMT

"The topP = 0; is at the top of the menu bar and not the frame."

Not so on Ubuntu.

It seems odd someone else has not run into this.

I will try again with upp 2164 where FrameLess(true); works correctly.

A few other problems also, will just revert back to where I was a few days ago.
