I did some quick check by putting the v2 strings in String Buffer

Results shows there 0x0D at the end of the string. I think this may be the error.

String s3;

```
for ( int i = 0; i < v1.GetCount(); i++ ) {  
    StringBuffer sb1;  
    int len = v2[i].GetLength() ;  
    sb1.SetLength ( len );  
    sb1 = v2[i];  
  
    for ( int i = 0; i < len; i++ ) {  
        s3 << Format ( "%02X", ( byte ) sb1[i] ) << "|" ;  
    }  
  
    s3 << "\n\n";  
  
/*  
r=MoveFile(v1[i],v2[i]);  
  
(!r)? err_no=GetLastError() : err_no=0;  
  
s<<"RENAME "  
    <<v1[i]<<" => "<<v2[i]  
    <<" [Done="<<r<<"] [Error="  
    <<err_no<<"]\n";  
*/  
}  
  
s << "\n" << s3 << "\n";  
  
// PRINTING THE RESULTS  
f.Set ( s );
```
