Hello Deep

I see that all file names end in a '0D' char that is a '\r'.

v2 Vector has been filled from a LineEdit using:

```
v2 = Split(s, "\n", true);
```

This means that every v2 element ends with a '0D' char.

If you would do this no '0D' char would be added:

```
v2 = Split(s, "\r\n", true);
```

Have I interpreted it well?
