Thanks for the speedy reply, Max!

I am certainly not in a hurry Still, I tried your suggestions. Fix number 1 works no problem, fix 2 induces a few other errors here and there. I will not bore you with the details since I guess it would be more of a nuisance than a help - after all, the important thing is in the package itself.

What might be helpful is the following: Since fix 1 solves the Visual Studio 2012 error, I have gone ahead and compiled the project again from scratch using that toolchain. Two points arise:

- First, the VC compiler keeps saying

C:\Program Files (x86)\Microsoft Visual Studio 11.0\VC\Include\crtdefs.h(446) : warning C4091: 'typedef ' :

ignored on left of '___w64 unsigned long' when no variable is declared after compiling every file

- Second, the library is linked correctly, yet the OCETest executable fails because of the following:

Linking...

Creating library C:\upp\out\bazaar\MSVC11.Gui.Usemalloc\OCETest.lib and object

C:\upp\out\bazaar\MSVC11.Gui.Usemalloc\OCETest.exp

OCE.lib(Graphic3d_WNTGraphicDevice.obj) : error LNK2019: unresolved external symbol

"private: void __thiscall Graphic3d_WNTGraphicDevice::

SetGraphicDriver(char const * const)"

(?SetGraphicDriver@Graphic3d_WNTGraphicDevice@@AAEXQBD@Z) referenced in function

"public: ___this

call Graphic3d_WNTGraphicDevice::Graphic3d_WNTGraphicDevice(char const * const)"

(?0Graphic3d_WNTGraphicDevice@@QAE@QBD@Z)

OCE.lib(OpenGL_Window.obj) : error LNK2019: unresolved external symbol

__imp__InterfaceGraphic_RealizePalette referenced in function "publ

ic: __thiscall OpenGL_Window::OpenGL_Window(class Handle_OpenGL_Display const &,struct

CALL_DEF_WINDOW const &,void *,class Handle_Ope

nGL_Context const &)"

(?0OpenGL_Window@@QAE@ABVHandle_OpenGL_Display@@ABUCALL_DEF_WINDOW@

@PAXABVHandle_OpenGL_Context@@@Z)

C:\upp\out\bazaar\MSVC11.Gui.Usemalloc\OCETest.exe : fatal error LNK1120: 2 unresolved externals

Still, it's very very close... Thanks Max for the great job!
