Hello Daniel

If GridCtrl has colored cells there is no function to get the data directly.

I propose you to add a function like this:

```
Value GridCtrl::GetValue(int row, int col)
{
    const Value &val = items[row + fixed_rows][col + fixed_cols].val;
    if(IsType<AttrText>(val)) {
        const AttrText& t = ValueTo<AttrText>(val);
        return t.text;
    } else
        return val;
}
```
