navi wrote on Thu, 29 November 2012 10:05 Thanks Honza for your very quick reply. Brilliant & simple solution Honza. It does remove the scrollbar as I wanted. However, we have a small problem. if the scrollbar frame is removed and user click on the tx1 then the tx1 goes mad!! text and blank lines get printed all over the place! any way to prevent this?

Regards

Navi

Oups, sorry I missed that. I'm not even sure why that happens, I'll have to look at it deeper, later today (not enough time right now, sorry...).
