Honza,

Thank you for your reply.

The following was my problem.

This is the .cpp file I missed to put VOID before the Menu::GetMenu();

```
Menu::GetMenu(){  
    for(int i = 0; i < 21; ++i){  
        menuVec.??????  
    }  
  
}
```

I apologize for the dumb mistake.  
Everything works great.

Best,  
Georgi
