Subject: Re: New Ubuntu nightly packages released
Posted by Lance on Fri, 07 Dec 2012 04:00:04 GMT

I haven't update upp in Ubuntu for a while. After a recent update, I notice all most all problems reported before are gone:
1. Now I can build gcc optimized;
2. Fullscreen back to normal;
3. Not-responding-to-keyboard problem also fixed;

Only problem remained is the remain-in-debug-mode-after-program-end problem.

Thank you, Honza!
Lance
