Neil,

I am still very far from understanding how to send an array of information.

I mean I literally want to send an array through.

Something like

```
Array arr;
```

```
loop start{  
    arr = fill with data  
}
```

```
TcpSocket sock;
```

```
sock.RawSend(arr);
```

Is it possible or I am just a dreamer ?

Thank you very much.

Best,
Georgi
