Ah-ha, ProcessEvents! That's **exactly** what I needed! So now I can do what I want:

```
while(!in.IsEof()) {  
    p <<= in.GetLine();  
    num++;  
    eNumLines <<= AsString(num);  
    ProcessEvents();  
}
```

or

```
while(num<100000) {  
    p <<= in.GetLine();  
    num++;  
    PI.Set(num, 100000);  
    ProcessEvents();  
}
```

I'm sure you can see what I'm trying to do - but is there a better way?
