victor wrote on Sun, 09 December 2012 07:43Getting UPP really working is a hard task in my opinion -

You must mean it's hard on Mac as Win and Linux versions work great.

The problem may be with Mac as they were slow updating to the latest java versions also.

How old is your Mac OS version, I think there is a version more compatible with Win. Just a guess as I don't nor do I intend to use Mac in the near future.
They do make things that look cute for $$$$$$.
