"connecting" Objective-C with C++ is something I have not had a need for so no idea how that is done.

It takes a bit of time to get familiar with U++ just like most.

Mac is fine it is just the cost comparison
An extra $100 or $200 for a smaller unit just to get extra memory and they don't have a micro sd card slot.

You are new so welcome to the forum.

The help on this forum is great, you will catch on.
