Subject: Re: Can I use Javascript frameworks with Skylark?
Posted by lectus on Mon, 17 Dec 2012 15:56:42 GMT

I got to work some basic CSS to create an interactive menu with Skylark. But still no jquery.

I'm afraid I'll need some guidance with sample code.

I'm mainly struggling with the paths, like where should I put each file to be recognized by Skylark.
