lectus wrote on Tue, 18 December 2012 01:31 This is really weird.

I got the paths right for JQuery and JQuery-UI.

In the log Skylark says

GET /jquery-ui.js

=== Response: 200

which means it found the file.

But it doesn't work.

Well, then it probably means your problem is somewhere else. If you post a complete package, so I can try to run it, I can try to help. Simply saying "But it doesn't work. " Doesn't give me any information to begin with
