Quote: The export DISPLAY=:0 didn't do anything on the user terminal.

Sorry I mixed up my explanations:

To export display to your computer:
ssh -YC myGumstix

To display on the lcd of my gumstix
ssh myGumstix   (no -YC)
in ssh console : export DISPLAY=:0

If I don't export DISPLAY=:0 in the gumstix console
I get the same errors as you when launching my app.
