## Subject: Re: How must Alpha be managed ??
Posted by Didier on Fri, 21 Dec 2012 15:24:30 GMT

Luigi,

Here is the example promised.

As for my problem:

Buttons 'CASE 1', 2 and 3 are the same but 'PREV' button doesn't have the same transparency.

On the other side, buttons 'CASE 4', 5, 6 and 'NEXT' have the same transparency.

Doing the example showed me that this has to do with the color used to fill the ImageDraw after applying the alpha value

... Still searching
