606-dev4 has serious problems under WindowsXP.

E. g. "examples/HelloWorld":

1. MSC8

- 1.1 Debug: OK (but other applications crash here when run)
- 1.1 Optimal: compiles and links without error but crashes when run
- 1.2 Speed: compiles and links without error but crashes when run
- 1.3 Size: compiles and links without error but crashes when run

2. MinGW

- 2.1 Debug: /upp/uppsrc/CtrlLib/XpTheme.dli:7: error: `MARGINS' has not been declared
- 2.1 Optimal: /upp/uppsrc/CtrlLib/XpTheme.dli:7: error: `MARGINS' has not been declared
- 2.1 Speed: /upp/uppsrc/CtrlLib/XpTheme.dli:7: error: `MARGINS' has not been declared
- 2.1 Size: /upp/uppsrc/CtrlLib/XpTheme.dli:7: error: `MARGINS' has not been declared

Werner
