nixnixnix wrote on Sat, 22 December 2012 20:07Hi Mirek,

When I try I get the following or similar error:

```
----- CtrlLib ( MT OCOE PRO AC CLIENT_MIT HEADLESS RAINBOW SKELETON GCC  
SHARED LINUX POSIX ) (1 / 26)
```

```
LabelBase.cpp
```

```
Button.cpp
```

```
Switch.cpp
```

```
EditField.cpp
```

```
Text.cpp
```

```
LineEdit.cpp
```

```
DocEdit.cpp
```

```
ScrollBar.cpp
```

```
HeaderCtrl.cpp
```

```
In file included from /home/nick/upp/uppsrc/CtrlCore/CtrlCore.h:20:0,
```

```
from /home/nick/upp/uppsrc/CtrlLib/CtrlLib.h:4,
```

```
from /home/nick/upp/uppsrc/CtrlLib/LineEdit.cpp:1:
```

```
/home/nick/upp/rainbow/Skeleton/Skeleton.h:75:14: error: cannot declare field
```

```
/home/nick/upp/rainbow/Skeleton/Skeleton.h:5:7: note: because the following virtual functions
```

```
/home/nick/upp/uppsrc/Draw/Draw.h:445:15: note: virtual void Upp::Draw::DrawImageOp(int, int,  
int, int, const Upp::Image&, const Rect&, Upp::Color)
```

```
/home/nick/upp/rainbow/Skeleton/Skeleton.h:74:7: note: because the following virtual functions
```

```
/home/nick/upp/uppsrc/Draw/Draw.h:445:15: note: virtual void Upp::Draw::DrawImageOp(int, int,  
int, int, const Upp::Image&, const Rect&, Upp::Color)
```

```
ArrayCtrl.cpp
```

repeated many times. Are my flags wrong? I have copied code across from upp/rainbow so that I now have upp/uppsrc, upp/bazaar and upp/rainbow. Are there more packages that I need please?

Nick

Now this rather looks like you have hit a period of instability - I am now working on new rainbow backends, adding or changing stuff here and there. Just yesterday I have found that skeleton was broken - uppweb did not compile. Today, it should be fixed in svn again.
