nlneilson wrote on Tue, 25 December 2012 18:04 Maybe break it down to two sections, logic and display.

How stuff is handled in the data base and pulled out.
This could just show as a list with ID and true/false, on/off, etc.
With whatever attributes you want to assign to each.

Then draw images for however you want it displayed.

What kind of laptop did you get?

I got an ASUS laptop.

So, how do I draw images? What's the recommended way?
